MUKESH AMARESH THAKUR

Software Development Engineer Intern Candidate | Go (Golang)

mukeshamareshthakur@gmail.com | Nepal | github.com/amareshthakur | linkedin.com/in/mukesh-amaresh-thakur-327a45230

PROFESSIONAL SUMMARY

Electronics, Communication and Information Engineering undergraduate with hands-on academic project experience building a Go-based attendance management system and an embedded-camera emotion detection prototype. Interested in backend engineering, data structures and algorithms, databases, and the integration of software with hardware.

TECHNICAL SKILLS

Languages: Go (Golang), Python
Backend & Security: Gin, REST API development, PASETO (project implementation)
Databases: PostgreSQL
Frontend: Next.js, Tailwind CSS, shadcn/ui
Embedded / IoT: ESP32, ESP32-CAM, fingerprint scanner, RFID reader
ML / Computer Vision: CNN, ResNet, emotion classification
Core CS: Data structures and algorithms, problem-solving; add only topics you can confidently discuss

PROJECTS

Automated Class Attendance System | Major Academic Project
Technologies: Go, Gin, PostgreSQL, PASETO, Next.js, Tailwind CSS, shadcn/ui, ESP32, fingerprint scanner, RFID reader

- Developed an attendance-system project designed to record attendance automatically according to each class time slot.
- Built the backend using Go and Gin with PostgreSQL for data storage and PASETO for token-based authentication.
- Built the web interface with Next.js, Tailwind CSS, and shadcn/ui; integrated fingerprint and RFID hardware with an ESP32-based workflow.

Facial Emotion Detection | Minor Academic Project
Technologies: Python, CNN, ResNet, ESP32-CAM, Kaggle emotion-detection dataset

- Developed a prototype that captures a face image using an ESP32-CAM and classifies the facial emotion with a trained model.
- Used a CNN/ResNet-based approach trained on a Kaggle emotion-detection dataset.

EDUCATION

Bachelor of Engineering — Electronics, Communication and Information Engineering
IOE, Paschimanchal Campus, Tribhuvan University, Nepal | Expected graduation: January 2027 (confirm) | Academic score: 65%

ADDITIONAL INFORMATION

Experience: Academic/self-directed projects; no formal internship reported.
